1 - Open Script window

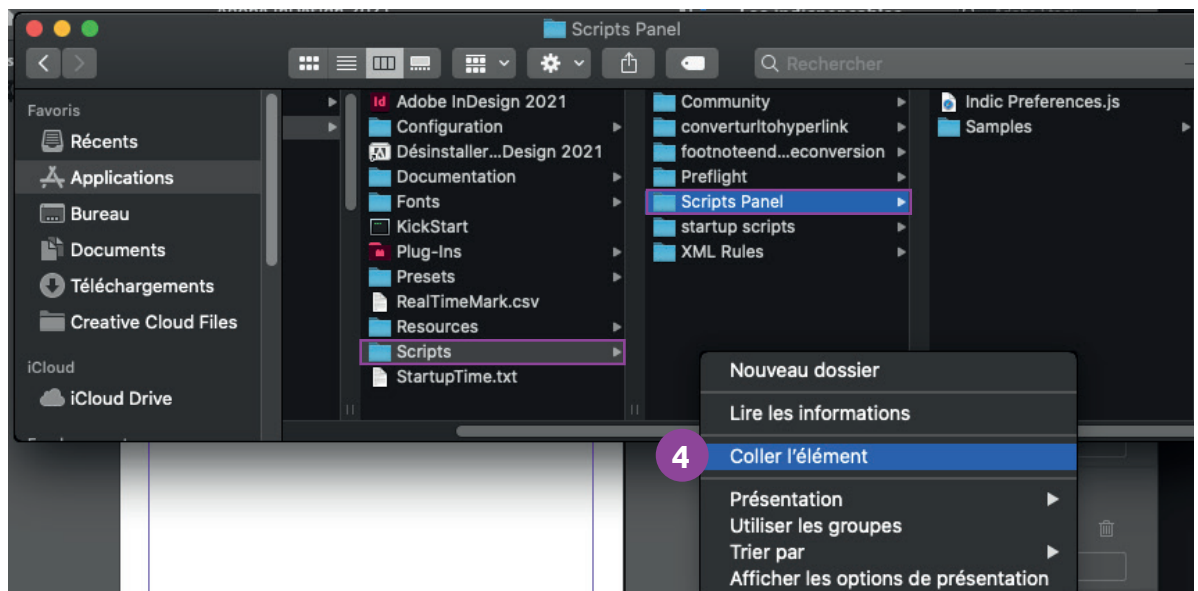

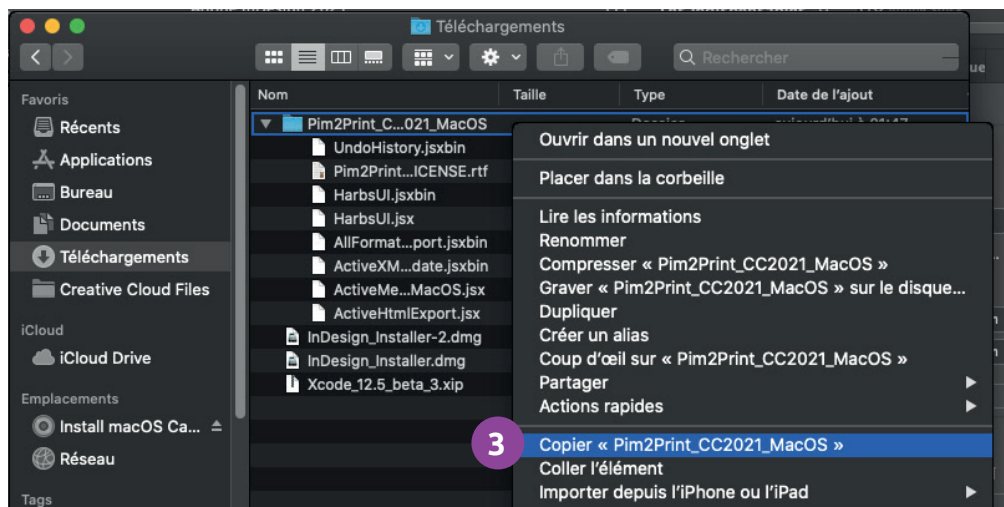

In your Adobe InDesign software open the Scripts panel (window -> utilities -> Scripts). Then in the options **(1)**, open the **Scripts** window directly in the Finder **(2)**.

Remember to close the software when the window is open in the Finder.

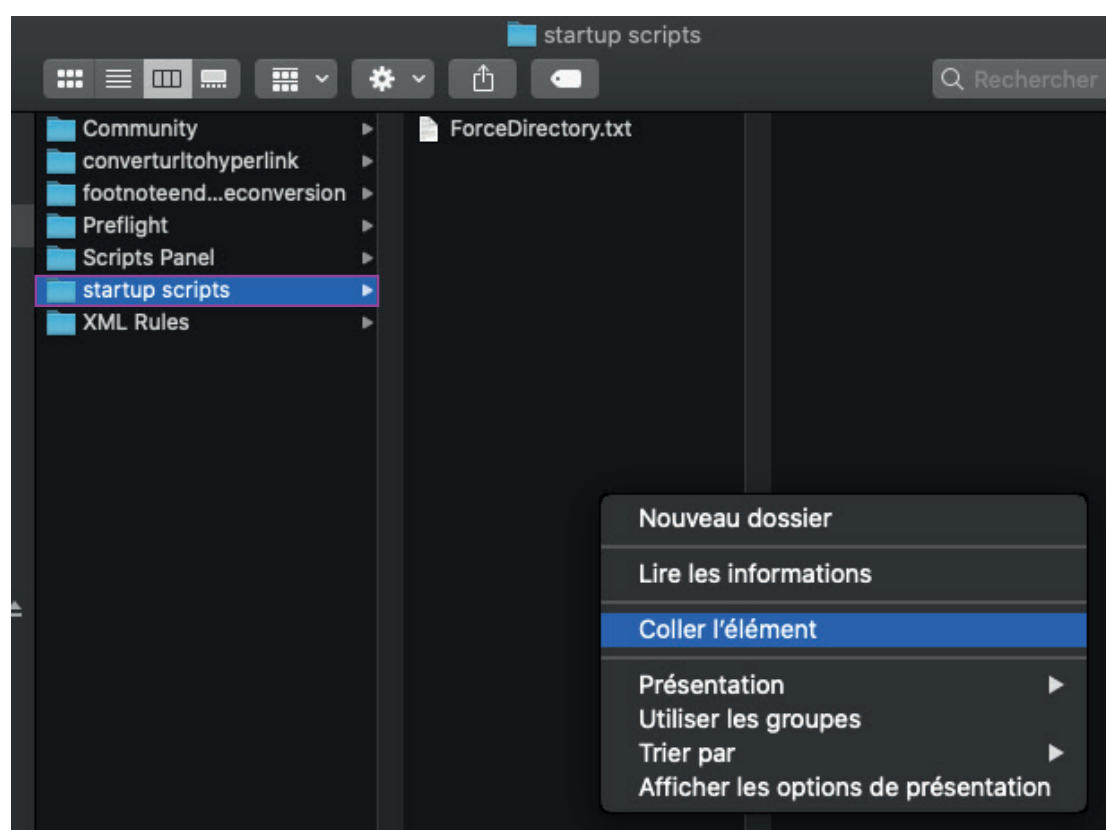

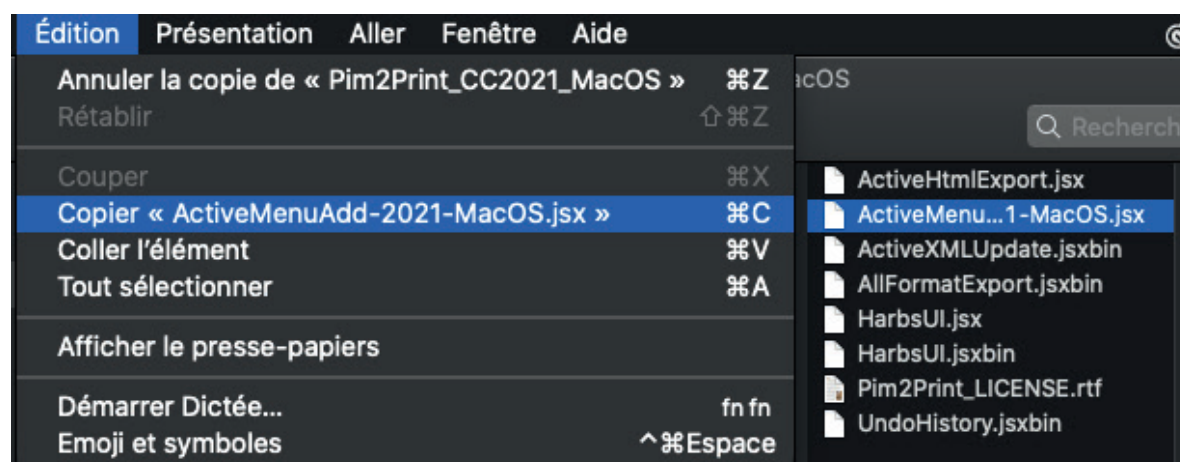

2 - Pim2Print copy

Copy the plug-in «Pim2Print_CC2021_MacOS» **(3)** and paste it in the **Scripts Panel** folder in the previously opened Scripts window **(4)**.

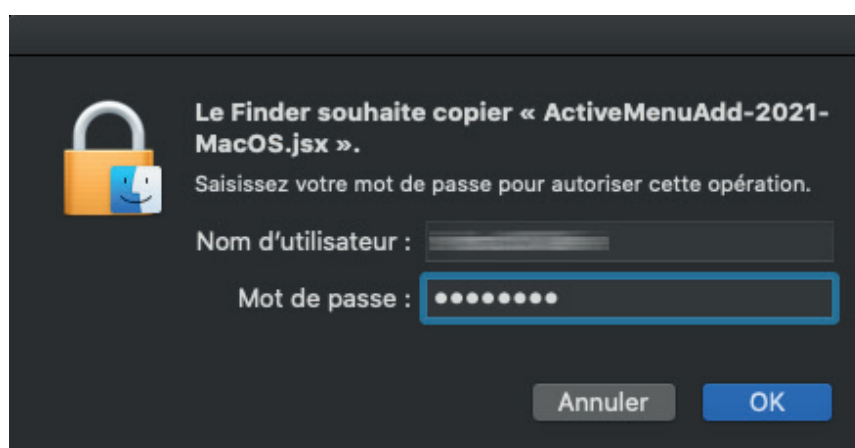

3 - Copy of the Pim2Print menu

In the **Pim2Print_CC2021_MacOS** plug-in, copy the **ActiveMenuAdd-2021-MacOS.jsx** (1) file then paste the element in the **startup scripts** (2) folder of the Scripts window previously opened.

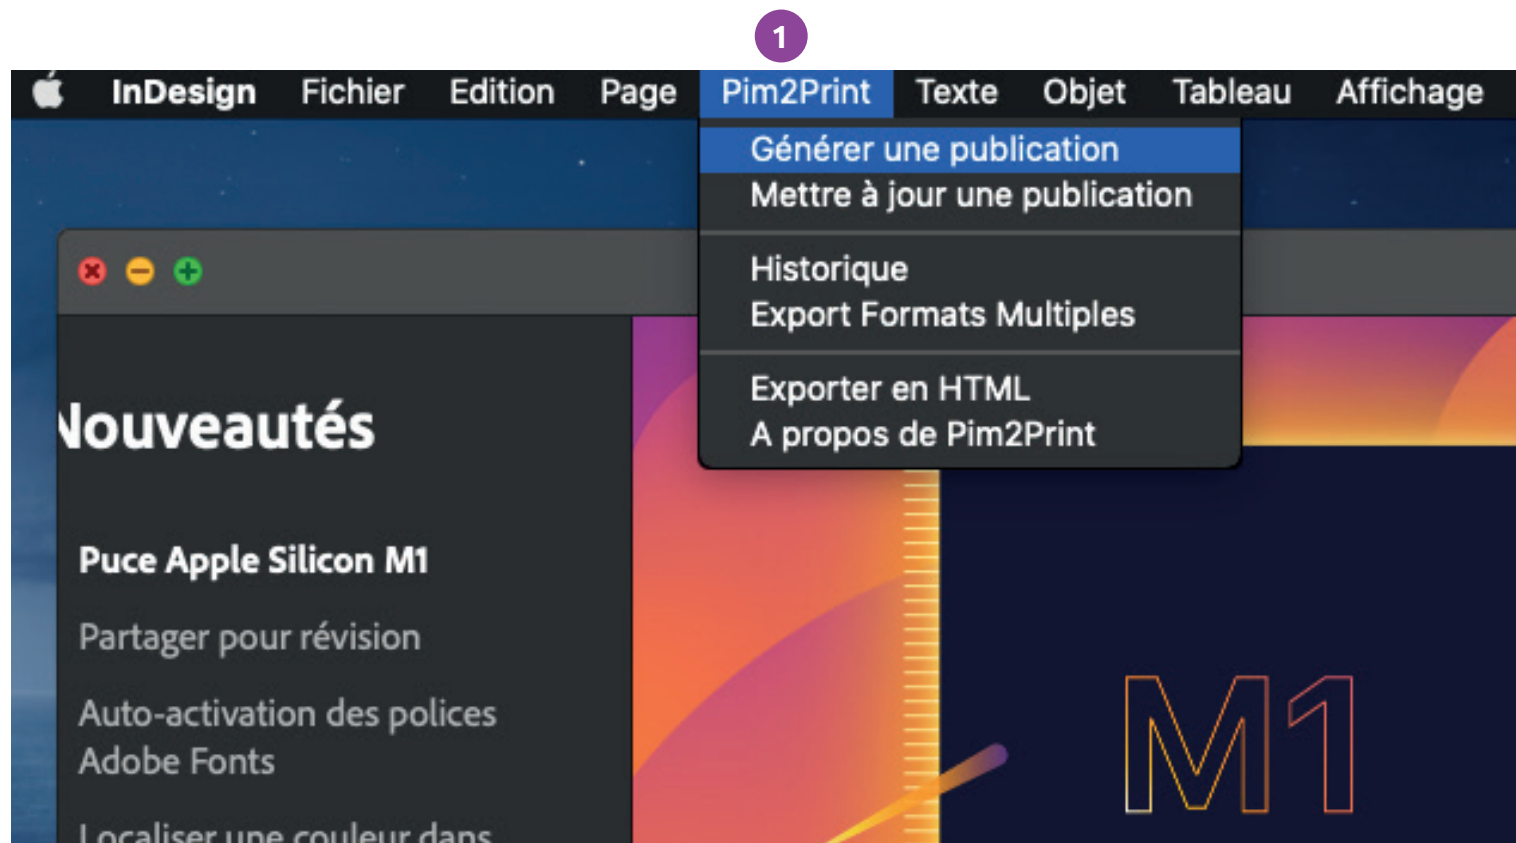

Warning : you must enter the **Admin password** to copy the Pim2Print plug-in and the Pim2Print menu.

4 - InDesign

You can then reopen your Adobe InDesign software.
The **Pim2Print** plug-in is now installed and functional **(1)**.
